

Retrovirologist
Division of Infectious Diseases and Epidemiology
Penn State College of Medicine, Hershey, PA

A faculty position is available for an outstanding research scientist (PhD, MD, or MD/PhD) to join the Division of Infectious Diseases and Epidemiology in the Department of Medicine at the Penn State College of Medicine and Hershey Medical Center. The Division has a tradition of excellence in basic science research in virology and immunology and benefits from a very close association with scientists in the Department of Microbiology & Immunology. The applicant's area of research should be focused on basic and translational research in retrovirology, including the areas of biochemistry, virus-cell interactions, and/or pathogenesis, with an emphasis on identifying new targets for antiretroviral therapy and potential collaboration with the Drug Discovery, Development and Delivery Core at the Penn State College of Medicine. Competitive start-up package and protected time for research will be offered. Salary and academic appointment on the tenure track will be commensurate with qualifications.

Interested individuals should send curriculum vitae, statement of research interests and list of three references by email to lparent@psu.edu (preferred) or by mail to Leslie J. Parent, M.D., Chief, Division of Infectious Diseases and Epidemiology, Department of Medicine, Penn State College of Medicine, 500 University Drive, Hershey, PA 17033. Penn State is committed to affirmative action, equal opportunity and diversity of its workforce. Women and minorities are encouraged to apply. Review of applications will commence immediately and continue until the position is filled.
