

Depression?

Penn State Milton S. Hershey Medical Center researchers are seeking volunteers who are currently in treatment for depression but continue to have significant symptoms. The purpose of this research study is to investigate the effects of exercise program in addition to usual treatment in individuals with depression.

Who may be eligible?

- Age 18 years or more
- Received two or more medication trials for current episode of depression
- Continue to have significant symptoms of depression
- Willing to continue current treatment

Comprehensive assessment is provided at no charge, and monetary compensation is provided for time and travel.
