

Remove/Change the "Sent from my iPhone" signature

You can easily stop the 'Sent from my iPhone' text from appearing on your iPhone emails by removing the text from the iPhone signature settings, here's how to do that:

1. \* Tap on "Settings"
2. \* Tap on "Mail, Contacts, Calendars"
3. \* Scroll down a ways and tap on "Signature"
4. \* Tap on "Clear"

Now exit from Settings and your iPhone will no longer attach the "Sent from my iPhone" message with emails.

### **How about changing it to something else?**

If you just want to change the iPhone email signature from the 'sent' message, just follow the directions from above but instead of tapping "Clear" and closing out, type a new message.

When you exit the Signature Settings, your message will be your new signature.
