

# STATEMENT OF COMMITMENT

## Penn State Hershey Graduate Medical Education

Penn State Hershey is fully committed to the education of health care professionals and providers as part of its core mission. This includes, but certainly is not limited to, allocation of substantial resources to support the educational programs, including those in graduate medical education. Penn State Hershey will continue to provide the educational environment and opportunities to meet the needs of all students and trainees.

The Graduate Medical Education Committee is committed to offer graduate medical education programs in which physicians in training develop personal, clinical and professional competence under the guidance and supervision of the faculty and staff. Graduate Medical Education Programs will ensure the progression of responsibilities through demonstrated clinical experience, knowledge and skill. Penn State Hershey is committed to and responsible for promoting patient safety and resident well-being and to providing a supportive educational environment.

This "Statement of Commitment" is supported by the governing authority, the Graduate Medical Education Committee, administration, the teaching faculty, and medical staff. It is the responsibility of the Graduate Medical Education Committee to assure that the necessary educational, financial and human resource provisions are made to support all Graduate Medical Education training programs.
